Platform Statement

I believe Judo is a great path to improving the lives of children and develop future citizens who add value to our communities. As such, we need to both support and protect our students experience within Judo. We need to ensure that our sport stays safe and our dojo's are a place where they feel safe and want to come.

To do this we need to improve our Coach Training Process. I have heard from several coaches that want to get their asst coaches certified through USA Judo but are finding it difficult due to availability of training sessions. There is an immense amount of experience within USA Judo that we could tap into.

I would work with the coach community to develop and/or improve our current training tools. Once we have good documentation, we can address how we disseminate this information. USA Judo should be a valued resource for the coaches beyond insurance.
